

KAVEEN KUMAR G

Data Analyst | Machine Learning Engineer

• +91 9494507979 • kaveenkumarg29@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Results-driven Data Science fresher with hands-on experience in Python, machine learning, and predictive modelling. Proven ability to build end-to-end ML pipelines from feature engineering to model evaluation on real-world datasets. Strong foundation in statistical analysis and tree-based models, with a keen interest in time-series forecasting and large-scale data processing.

TECHNICAL SKILLS

Languages	Python (Proficient), SQL (Proficient), HTML, CSS
ML / Algorithms	SVM, Logistic Regression, Linear Regression, Random Forest, XGBoost
Libraries	Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib
BI & Tools	Power BI, Streamlit, Jupyter Notebook, Microsoft Excel
Core Concepts	Feature Engineering, Model Evaluation (AUC-ROC, Precision, Recall), Cross-Validation, Regularization
Soft Skills	Analytical Thinking, Problem Decomposition, Debugging, Cross-functional Collaboration

INTERNSHIP EXPERIENCE

Data Scientist Intern GradTwin Technology, Chennai	2024
- Built a Medical Cost Estimation predictive model using ML and statistical analysis on large real-world datasets. - Performed end-to-end data pipeline work: data cleaning, feature selection, model training, and performance validation. - Identified key cost drivers through exploratory data analysis, improving model accuracy and interpretability. - Gained hands-on experience with Python, Pandas, NumPy, and Scikit-learn in a production-like environment.	

PROJECTS

Multiple Disease Prediction System	Academic Project
- Designed a web app to predict Diabetes, Heart Disease, and Parkinson's Disease from health parameters using SVM and Logistic Regression applicable to real-time, low-latency prediction use cases. - Performed feature selection, hyperparameter tuning, and model evaluation using accuracy, precision, and recall metrics.	
Tech Stack: Python, Scikit-learn, Streamlit, Pandas, NumPy	
Blinkit Sales Dashboard Analysis	Data Analysis Project
- Analysed large-scale retail sales data (item type, outlet type, customer ratings) to derive actionable business insights transferable to inventory and demand analytics. - Built an interactive Power BI dashboard for data-driven inventory optimisation and sales trend analysis. - Applied data aggregation, comparative analysis, and visualisation best practices to present findings clearly.	
Tech Stack: Python, Pandas, NumPy, Seaborn, Power BI	

EDUCATION

B.Tech, Computer Science and Engineering SRM Institute of Science and Technology	2021 – 2025
CGPA: 8.28	
Board of Intermediate Education Narayana Junior College	2019 – 2021
Score: 89%	
Board of Secondary Education Narayana Group of Schools	2018 – 2019
Score: 85.5%	

CERTIFICATIONS & ACHIEVEMENTS

- Python for Data Science Certified by IIT Madras (NPTEL)
- 3× District-Level Tennis Champion (2016, 2017, 2018) demonstrates competitive mindset and discipline
